INDEX TO VOLUME XLVIII

ABLAHADIAN, E. See ROGERS, RAHE and ABLAHADIAN, 79.

Adrenals, epinephrin secretion from, not indispensable, 397.

ALLEN, G. D. Quantitative studies on the rate of respiratory metabolism in Planaria. I. The effect of potassium cyanide on the rate of oxygen consumption, 93.

ANDRUS, E. C. Alterations in the activity of the terrapin's heart relative to slight changes in the P_H value of the perfusate, 221.

Antineuritic vitamine in wheat and corn kernel, 504.

BARIUM stimulation, synergy and antagonism of sodium salts in, 497.

BECHT, F. C. Observations on the catalytic power of blood and solid tissue, 171.

BERGEIM, O., J. M. EVVARD, M. E. REHFUSS and P. B. HAWK. The gastric response to foods. II. A fractional study of the coagulation of milk in the human stomach, 411.

——. See HAWK, FISHBACK and BERGEIM, 211.

Bile secretion, effect of gland extracts on, 192.

BINGER, C. See GOLDSCHMIDT and BINGER, 473.

Blood, catalytic power of, 171.

—— diastase and placental function, 481.

——, osmotic pressure equilibrium between intestinal contents and, 440.

Brain bulk, experimental alteration of, 531.

BURGE, W. E. The reason for the specific dynamic action of protein, 133.

CALCIUM salts, influence of, on sodium chloride absorption in intestine, 473.

Carbon dioxide during starvation in Planaria, 231.

Cardiac irritability, effect of fatigue on, 13.

Cardio-skeletal quotient, 13.

Catalase, influence of protein on, 133.

Catalytic power of blood and solid tissue, 171.

Cell, living, function of nucleus of, 258.

Cerebro-spinal fluid pressure, 512.

CHILD, C. M. A comparative study of carbon dioxide production during starvation in Planaria, 231.

——. The effect of cyanides on carbon dioxide production and on susceptibility to lack of oxygen in Planaria dorotocephala, 372.

Chlorides, one-sided permeability of intestinal wall to, 419.

Colon, the, studies on, 419, 433, 440, 450, 459, 473.

Cyanides, effect of, on metabolism in Planaria, 372.

DAYTON, A. B. See GOLDSCHMIDT and DAYTON, 419, 433, 440, 450, 459.

DOWNS, A. W. and N. B. EDDY. The influence of internal secretions on the formation of bile, 192.

EDDY, N. B. See DOWNS and EDDY, 192.

Electrolyte, stimulation by outward diffusion of, 161.

Electrotonus, effect of narcosis on, 1.

Epinephrin, output of, in shock, 22.

—— secretion of adrenals not indispensable, 397.

Esterase, liver, stability of, 141.

Ether hyperglycemia, mechanism of, 146.
Evvard, J. M. See Bergeim, Evvard, Rehfuss and Hawk, 411.
Eye, electrical responses of, to stimulation by light of various wavelengths, 45.

Fat, intravascular, in experimental shock, 331.
Fatigue, effect of, on cardiac irritability, 13.
Fishback, H. R. See Hawk, Fishback and Bergeim, 211.
Food, gastric response to, 411.
—— properties of bakers' yeast, 199.
Frizzell, T. P. The effect of narcosis on electrotonus, 1.

Gastric response to food, 411.
—— secretion, influence of organ extracts on, 79.
Gland extracts, effect of, on bile secretion, 192.
Goldschmidt, S. and C. Binger. Studies in the mechanism of absorption from the intestine. VI. The colon. The influence of calcium salts upon the absorption of sodium chloride in the intestine, 473.
Goldschmidt, S. and A. B. Dayton. Studies in the mechanism of absorption from the intestine:
I. The colon. A contribution to the one-sided permeability of the intestinal wall to chlorides, 419.
II. The colon. On the passage of fluid in two directions through the intestinal wall, 433.
III. The colon. The osmotic pressure equilibrium between the intestinal contents and the blood, 440.
IV. The colon. The behavior of sodium and magnesium sulphate solutions, 450.
V. The colon. The effect of sodium sulphate upon the absorption of sodium chloride when the salts are introduced simultaneously into the intestine, 459.
Growth-promoting properties of compressed yeast, 211.

Hawk, P. B., H. R. Fishback and O. Bergeim. Compressed yeast as food for the growing organism, 211.
——, C. A. Smith and R. C. Holder. Bakers' yeast as food for man, 199.
——. See Bergeim, Evvard, Rehfuss and Hawk, 411.
Heart, turtle, effect of hydrogen ions on, 221.
Hemorrhage, treatment of, by intravenous injections, 121.
Holder, R. C. See Hawk, Smith and Holder, 199.
Hydrogen ions, effect of, on turtle heart, 221.
Hyman, L. H. On the action of certain substances on oxygen consumption. II. Action of potassium cyanide on Planaria, 340.
Hyperglycemia, ether, mechanism of, 146.

Intestinal contents and blood, osmotic pressure equilibrium between, 440.
—— wall, passage of fluid in two directions through, 433.
Intestine, mechanism of absorption from, 419, 433, 440, 450, 459, 472.
Intravascular fat in experimental shock, 331.
Intravenous injections, effect of, on cerebro-spinal fluid pressure, 512.

Keeton, R. W. and E. L. Ross. The mechanism of ether hyperglycemia, 146.
Kito, H. An experimental contribution to the biological relation of the diastase-ferment between the maternal blood, the fetal blood and the amniotic liquid of animals, 481.

LIGHT stimulation, electrical responses of the eye to, 45.
Liver esterase in glycerol, stability of, 141.
LYNCH, V. The function of the nucleus of the living cell, 258.

MCKIBBEN, P. S. A note on intravascular fat in relation to the experimental study of fat embolism in "shell shock," 331.
——. See WEED and MCKIBBEN, 512, 531.
MCPEEK, C. See SHEARD and MCPEEK, 45.
Magnesium sulphate solutions, sodium and, behavior of, 450.
MENDENHALL, W. L. Effect of fatigue upon the heart and cardio-skeletal quotient, 13.
Metabolism in Planaria, effect of cyanides on, 372.
——, respiratory, in Planaria, 93.
Milk coagulation in human stomach, 411.
MYERS, C. N. See VOEGTLIN and MYERS, 504.

NARCOSIS, effect of, on electrotonus, 1.
Nucleus of living cell, function of, 258.

ORGAN extracts, influence of, on gastric secretion, 79.
Osmotic pressure equilibrium between intestinal contents and blood, 440.
Oxygen consumption, action of potassium cyanide on, 93, 340.

PENFIELD, W. G. The treatment of severe and progressive hemorrhage by intravenous injections, 121.
Placental function, blood diastase and, 481.
Planaria, action of potassium cyanide on, 340.
——, carbon dioxide during starvation in, 231.
Planaria, effect of cyanides on metabolism in, 372.
——, respiratory metabolism in, 93.
Plethysmographic study of shock and stammering, 285.
Potassium cyanide, action of, on Planaria, 340.
—— ——, effect of, on rate of oxygen consumption, 93.
Protein, specific dynamic action of, 133.

RAHE, J. M. See ROGERS, RAHE and ABLAHADIAN, 79.
Rats, effect of underfeeding on weight of organs of, 67.
REHFUSS, M. E. See BERGEIM, EVVARD, REHFUSS and HAWK, 411.
Respiratory metabolism in Planaria, 93.
ROBBINS, S. D. A plethysmographic study of shock and stammering, 285.
ROGERS, J., J. M. RAHE and E. ABLAHADIAN. The stimulation and inhibition of the gastric secretion which follows the subcutaneous administration of certain organ extracts, 79.
ROGOFF, J. M. See STEWART and ROGOFF, 22, 397.
ROSS, E. L. See KEETON and ROSS, 146.

SHEARD, C. and C. MCPEEK. On the electrical responses of the eye to stimulation by light of various wave-lengths, 45.
Shock and stammering, a plethysmographic study of, 285.
——, experimental, intravascular fat in, 331.
——, output of epinephrin in, 22.
SIMONDS, J. P. On the stability of esterase in ground liver preserved in glycerol, 141.
SMITH, C. A. See HAWK, SMITH and HOLDER, 199.
Sodium and magnesium sulphate solutions, behavior of, 450.

Sodium salts, barium stimulation, synergy and antagonism of, 497.
—— sulphate, effects of, on sodium chloride absorption in intestine, 459.
Stammering, shock and, a plethysmographic study of, 285.
Starvation in Planaria, carbon dioxide during, 231.
STEWART, C. A. Changes in the weights of the various parts, systems and organs in albino rats kept at birth weight by underfeeding for various periods, 67.
STEWART, G. N. and J. M. ROGOFF. Further observations showing that epinephrin from the adrenals is not indispensable, 397.
—— —— ——. The output of epinephrin in shock, 22.
Stimulation by outward diffusion of electrolyte, 161.
Stomach, coagulation of milk in, 411.
Synergy and antagonism of sodium and barium salts, 497.

TISSUE, solid, catalytic power of, 171.

UNDERFEEDING, effect of, on weight of organs in rats, 67.

VITAMINE, antineuritic, in wheat and corn kernel, 504.
VOEGTLIN, C. and C. N. MYERS. Distribution of the antineuritic vitamine in the wheat and corn kernel, 504.

WEED, L. H. and P. S. McKIBBEN. Experimental alteration of brain bulk, 531.
—— —— ——. Pressure changes in the cerebro-spinal fluid following intravenous injection of solutions of various concentrations, 512.
Weight of organs in rats, effect of underfeeding on, 67.

YEAST, bakers', as food for man, 199.
——, compressed, as food for growing organism, 211.

ZOETHOUT, W. D. Stimulation by the outward diffusion of an electrolyte from the irritable tissue, 161.
——. The synergy and antagonism of sodium salts in barium stimulation, 497.

DEC 5 1919
